

# BRYANT ABALOS

Los Angeles, CA 90066 | bjabalos808@gmail.com

[LinkedIn](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

**Systems Analyst & Automation Lead** contracted at **Google** (via Cognizant), delivering **99.9% uptime** for high-traffic pipelines. Expert in architecting **SQL/API automation** solutions and utilizing **JavaScript/App Script** for efficiency. Proven track record of reducing manual reporting time by 40% and streamlining audit cycles.

## TECHNICAL SKILLS

**Languages/Scripting:** SQL (BigQuery/MySQL), JavaScript (App Script), Python, Bash, HTML/CSS

**Cloud/Systems:** AWS (S3/EC2), GCP, ServiceNow, JIRA, REST API, Excel

**Visualization:** Tableau, Power BI, Looker Studio, Appsheet, Dashboards

**Concepts:** Infrastructure Stability, RCA, AIOps, Agile/Scrum, Data Storytelling, System Optimization, Automation, AI

## PROFESSIONAL EXPERIENCE

### Cognizant

Playa Vista, CA

Systems Analyst / Automation Lead

Oct 2024 – Present

- Managed high-traffic GCP pipelines processing **40,000+** daily records while maintaining **99.9% global uptime**.
- Architected SQL and API automation solutions in BigQuery that eliminated manual bottlenecks and reduced reporting time by **40%**
- Reduced **MTTR by 15%** through the development of automated log engineering and system tracking frameworks.
- Awarded the **Raising The Bar** award and a 5/5 performance rating for ensuring system stability during complex migrations.

### Smartronix (SMX)

Honolulu, HI

Data/Software Engineering Intern

Jun 2023 – Aug 2023

- Developed **Python-based extraction tools** to automate data categorization, increasing processing speeds by **30%**.
- Improved search accuracy by **18%** through comparative analysis of NLP models, specifically utilizing KeyBERT.

### Adobe

San Diego, CA

Student Engagement Lead

May 2022 – May 2024

- Analyzed market trends across **20+ organizations** to generate **250+ qualified leads**.
- Increased product adoption by **20%** through the execution of data-driven lifecycle marketing campaigns.

## TECHNICAL PROJECTS

### Inventory Tracking System (ITS) & Automation Framework

APIs, AppSheet, AppScript, SQL

- Architected a relational database system across 6 interconnected tables to manage hardware allocation, software versions, and live participant tracking
- Developed a cloud-based relational database application with a real-time mobile scanning interface to automate the tracking, auditing, and assignment of enterprise hardware.

### Automated Compliance & Auditor Toolkit

SQL, JavaScript, Looker Studio

- Built a centralized auditor dashboard to automate compliance gap detection and provide real-time decision support.
- Streamlined audit cycles by **30%** and prevented "silent" database discrepancies through automated validation logic.

### Enterprise Financial Logic & Incentive Engine

JavaScript, BigQuery

- Resolved critical logic bugs in compensation algorithms to ensure 100% financial precision for incentive payouts.
- Utilized advanced SQL to validate historical payout data, successfully preventing negative audit findings and financial leakage.

## EDUCATION

San Diego State University

San Diego, CA

B.S. Management Information Systems

May 2024
